TURNAROUND IN THE ENERGY SECTOR

Restoring stakeholder value through
hands-on leadership

www.dbuchler.com

The global energy sector is going through unprecedented change brought about by political and regulatory reform.

This results in an ever-increasing focus on delivering sustainable business performance across the value chain from natural resource extraction to end user sales.

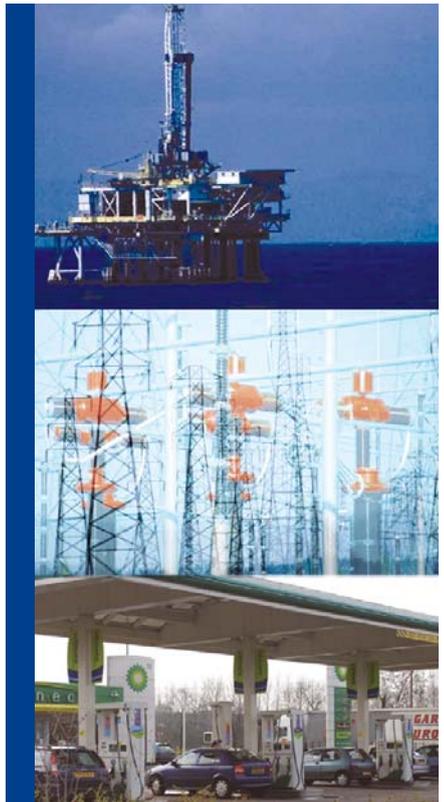

DB Consultants is dedicated to business turnaround – identifying corporate needs and putting in place the fundamental changes that are required to revitalise performance and recreate prosperity for the stakeholders.

Our focus is on:

- under-performing businesses
- mature or poorly performing assets
- revitalising State-owned enterprises
- acquisitions and disposals

Our scope is global, our expertise is of the highest calibre and our track record impressive.

Breathing new life into business

Turnaround must go beyond buying time, it's about rebuilding futures

DB Consultants offers far more than just the technical expertise to restructure businesses and assets. Though finance may be a major symptom of distress needing immediate remedy, it is rarely the sole cause of a company's difficulties.

Our business acumen extends to all areas that advance progress:-

- leadership and motivation
- operational efficiency
- shareholder confidence
- evolving market opportunities
- improving competitiveness
- technology advances
- managing change
- securing finance

Our involvement is very much hands-on, taking up executive and non-executive positions where this is appropriate in order to drive through the changes required for recovery.

We have a lifetime's experience of tackling these critical issues on behalf of our clients. Our approach is flexible, discreet and always professional. Our intention is always to restore sustainable profitability.
