

COMPANY TURNAROUND

Hands-on leadership through crisis to recovery

The demise of a company is a tragedy - for its shareholders, its management, the employees, customers, dependent suppliers and often for the community in which it is based.

It becomes even more of a tragedy when that decline is avoidable.

DB Consultants is dedicated to company turnaround - identifying corporate needs and putting in place the fundamental changes that are required to revitalise performance and recreate prosperity for the stakeholders.

Our scope is international, our expertise is of the highest calibre and our record of success impressive.

Breathing new life into business

You cannot simply hope that things will get better. Without action, they won't. You have to instigate change.

Turnaround must go beyond buying time, it's about rebuilding futures

DB Consultants offers far more than just the technical expertise to restructure the business finances. Though finance may be a major symptom of distress needing immediate remedy, it is rarely the sole cause of a company's difficulties.

Our business acumen extends to all areas that advance or impede progress:-

- leadership and motivation
- operational efficiency
- shareholder confidence
- changing markets
- increasing competition
- technology advances
- managing change
- financial discipline

Our involvement is very much hands-on, taking up executive and non-executive positions where this is appropriate in order to drive through the changes required for recovery.

We have a lifetime's experience of tackling these critical issues on behalf of our clients. Our approach is flexible, discreet and always professional. Our intention is always to restore a company to sustainable profitability.
